

## ABSTRACT

The aim of the course is to illustrate the state of the art in diagnosis and treatment of malignant tumors involving the skull.

The objective of this event is to provide the most up-to-date knowledge on diagnosis and treatment of these tumors.

It's a border area that involves surgeons of different specialties, medical oncologists, radiation therapists, radiologists and nuclear physicians. This is the reasons why the Italian Skull Base Society propose this interesting educational course.

The course comprises teaching sessions as well as discussion of clinical cases. Lectures by experts specialists will end the day. The society is asking no fee in order to encourage young colleagues.
